Education

University of South Florida - Tampa — *Expected Graduation*: **May 2028**
*Master of Science in **Computer Science*** — *GPA: 4.0/4.0*

University of South Florida - Tampa — Completed: May 2026
*Bachelor of Science in **Computer Science*** — *GPA: 3.52/4.0*
Relevant Coursework: *Data Structures and Algorithms (C)*, *Operating Systems (C)*, *Database Design (PostgreSQL)*, *Computer Networks I (C)*, *Computer Architecture*, *Network Analysis and Machine Learning (Python)*, *Software System Development (C#)*, *UX Design*.

Skills

Programming Languages: JavaScript, TypeScript, HTML5, CSS3, Python, C/C++, SQL
Technologies & Tools: React.js, REST APIs, DOM, Jest, Unit & Integration Testing, Git, GitHub Actions, Docker, Firebase (GCP), AWS (Amazon S3), PostgreSQL, Linux, TCP/IP, Figma, Agile/Scrum, AI coding tools (GitHub Copilot, Claude)
Certificates: Foundations of User Experience (UX) Design - Google, Google UX Design (In progress)
Languages: English (fluent), Portuguese (fluent), Italian (beginner), Spanish (beginner)

Experience

Research Assistant Developer — March 2026 – Present
University of South Florida — *Tampa, FL*
- Engineered a **full-stack React/Firebase** application for **2** experimental workflows in a planned **18-session** cognitive research study, translating researcher requirements into accessible interfaces.
- Developed reaction-time recording synchronized with musical onset and offset timestamps, validating **3** input configurations: mouse, trackpad, and iPad-connected keyboard.
- Built an **admin dashboard** with bulk Excel export, consolidating participant data into one workbook and eliminating manual collection and merging of individual records.

Operation Technology Infrastructure Developer — August 2026 – Present
University of South Florida — *Tampa, FL*
- Validated **300+** HVAC data points against a legacy system, correcting **10** configuration discrepancies in types, values, and engineering units before deployment.
- Built reusable HVAC display templates for **5+** device types (including VAV, SAV, and AHU), eliminating the need to build a separate display for each device.

Software Engineer Intern — June 2025 – August 2025
TELUS Digital — *Durham, NC, USA*
- Quickly learned **TinyMCE's** plugin architecture to deliver resizable PDF embeds on deadline, validating functionality across **3** browsers.
- Fixed job-application progress tracking with **index-based** state tracking, validating progress indicators across **10** exam-sequence scenarios.
- Resolved **2** production frontend defects using **Sentry** and browser tools, working with engineers and QA to reproduce and validate fixes across environments.

Software Engineer Intern — June 2024 – August 2024
TELUS Digital — *São Paulo, Brazil*
- Shipped a **full-stack React/REST API** feature to delete all of a user's conversations at once, saving an estimated **8 hours** of manual testing per release (test-engineer estimate).
- Identified orphaned playground records in a single-conversation deletion endpoint and executed a database migration to clean inconsistent data in a company-wide **relational database**.
- Added **Jest** unit and integration tests for **TypeScript/TypeORM** bulk deletion, verifying removal of conversations, messages, and associated playground records.

Volunteering Experience

Technology Development Analyst — May 2023 – August 2024
Brazilian Student Association — *USA (Remote)*
- Co-led a conference web application for **3** BRASA Conferences attended by **1,900+** participants and employers.
- Developed workshop selection, registration, and cancellation in **React/TypeScript**, supporting about **300** registrations across **8** workshops at BRASA At Home.
- Integrated **AWS S3** image storage into a **React** web application, using custom hooks to retrieve and display image assets.
