Education

University of South Florida - Tampa

Master of Science in **Computer Science**

Expected Graduation: **May 2028**

GPA: 4.0/4.0

University of South Florida - Tampa

Bachelor of Science in **Computer Science**

Completed: May 2026

GPA: 3.52/4.0

Relevant Coursework: Data Structures and Algorithms (C), Operating Systems (C), Database Design (PostgreSQL), Computer Networks I (C), Computer Architecture, Network Analysis and Machine Learning (Python), Software System Development (C#), UX Design.

Skills

Programming Languages: JavaScript, TypeScript, HTML5, CSS3, Python, C/C++, SQL

Technologies & Tools: React.js, REST APIs, DOM, Jest, Unit & Integration Testing, Git, GitHub Actions, Docker, Firebase (GCP), PostgreSQL, Linux, TCP/IP, Figma, Agile/Scrum, AI coding tools (GitHub Copilot, Claude)

Certificates: Foundations of User Experience (UX) Design - Google, Google UX Design (In progress)

Languages: English (fluent), Portuguese (fluent), Italian (beginner), Spanish (beginner)

Experience

Research Assistant Developer

March 2026 – Present

University of South Florida

Tampa, FL

- Designed and **built** a responsive end-to-end **full-stack** web platform for cognitive research using **React** and **Firebase** by aligning with stakeholders to define requirements and applying **UX** best practices for participants with disabilities.
- Developed a reaction time recording system synchronized with musical theme onset and offset timestamps, enabling accurate behavioral data collection for cognitive research.
- Built an admin dashboard enabling researchers to view participant response data and export it to Excel, removing the need for manual database queries.

Operation Technology Infrastructure Developer

August 2026 – Present

University of South Florida

Tampa, FL

- Validated **300+** HVAC data points by verifying point types, live values, and engineering units against the legacy system, identifying and correcting 10 configuration discrepancies before deployment.
- Applied **UX design** principles to HVAC device displays by organizing critical points (temperatures, setpoints, alarms) for fast readability, reducing the time operators need to locate key information by **80%**.

Software Engineer Intern

June 2025 – August 2025

TELUS Digital

Durham, NC, USA

- Independently learned TinyMCE's plugin architecture to implement **resizable PDF embeds** within a rich-text editor, quickly ramping up on an unfamiliar framework to meet a deadline.
- Resolved a stepper state logic bug in a multi-stage job application workflow by replacing step categorization from name-based grouping to index-based tracking, ensuring accurate progress indicators across dynamic exam steps, covered by **unit tests**.
- Debugged client-side production errors reported in Sentry logs and browser developer tools by collaborating with engineers, PMs, and QA to reproduce failures across multiple environments, restoring platform stability.

Software Engineer Intern

June 2024 – August 2024

TELUS Digital

São Paulo, Brazil

- Built and shipped a **full-stack feature** end-to-end for a chatbot platform to manage conversation data, developing both the React frontend and the **REST API** endpoint with database logic, saving 8+ hours of manual testing per release cycle.
- Executed a **database migration** to remove orphaned records and resolve data inconsistencies in a company-wide **relational database**, improving data integrity for internal systems used across the organization.
- Developed using **TypeScript**, **TypeORM**, **React**, and **Jest**, writing and maintaining unit and integration tests and shipping through peer code review to ensure production-ready code.

Volunteering Experience

Tech Development Analyst

May 2023 – August 2024

Brazilian Student Association

USA (Remote)

- Co-led the development of a web application for BRASA Conferences attended by approximately **1,900+** participants and employers across 3 BRASA events.
- Developed a feature implementing registration functionality for workshops using **React** and **TypeScript**, streamlining workshop selection, registration, and cancellation for attendees.
