EDUCATION

University of South Florida
Master of Science in Computer Science

May 2028

University of South Florida
Bachelor of Science in Computer Science

May 2026

GPA: 3.52/4.00

Relevant Coursework: Data Structures and Algorithms (C), Program Design (C++), Operating Systems (C), Database Design (PostgreSQL), Computer Networks I (C), Big Data with Apache Hadoop (Java), Computer Architecture, Probability and Statistics, Network Analysis and Machine Learning (Python), Social Media Mining (Python)

SKILLS

Programming Languages: JavaScript, TypeScript, HTML, CSS, C/C++, Python, Java

Technologies & Tools: PostgreSQL, SQL, Node.js, React, Git, GitHub, Docker, Windows/Linux, Agile

Certificates: CCNAV7: Introduction to Networks - Cisco Networking Academy (Credly Badge), Cybersecurity Essentials - Cisco Networking Academy, Discover's path – Rocketseat

Languages: English (fluent), Portuguese (fluent), Italian (beginner), Spanish (beginner)

PROFESSIONAL EXPERIENCE

Research Assistant Developer, *University of South Florida*, Tampa, FL

March 2026 – Present

- Designed and **developed** a **full-stack** web platform for clinical cognitive research using **React**, and Firebase, applying **UX** best practices to ensure accessibility and usability for older adults and individuals with MCI.
- Implemented a music attention task with real-time reaction time recording relative to musical theme onset and offset timestamps, enabling structured behavioral data collection.
- Deployed two independent study conditions to Firebase Hosting via GitHub Actions CI/CD pipeline, maintaining separate React branches for controlled experimental conditions.

Software Engineer Intern, *TELUS Digital*, Durham, NC, USA

June 2025 – August 2025

- Enhanced a React-based platform by refactoring document handling and improving system reliability, enabling more scalable content workflows across enterprise tools
- Resolved stepper state logic bug in a multi-stage job application workflow by **replacing** step categorization from name-based grouping to index-based tracking, ensuring accurate progress indicators across dynamic exam steps.
- Debugged client-side production errors reported in Sentry logs by reproducing failures across multiple environments and removing an obsolete CSS file, restoring platform stability.

Software Engineer Intern, *TELUS Digital*, São Paulo, Brazil

June 2024 – August 2024

- Built a full-stack **feature** for a chatbot platform to manage conversation data, **integrating** React frontend with backend database operations and **improving** automated test efficiency by 8+ hours
- Executed a **database migration** to remove orphaned records and resolve data inconsistencies in a **large-scale** relational schema, improving data integrity and reducing query latency.
- Developed using **TypeScript**, **TypeORM**, **React**, and **Jest**, ensuring maintainable code and reliable unit test coverage.

VOLUNTEER EXPERIENCE

Tech Development Analyst, *Brazilian Student Association*, USA (remote)

May 2023 – August 2024

- Co-led in the **development** of a **web application** for Brasa Conferences attended by approximately **1900+** participants and employers in all 3 BRASA events.
- Developed a **feature** that implements a registration functionality in workshops, **facilitating** the process and the experience of participants in choosing, registering and cancelling their registration using **React** and **TypeScript**.
